

Sprint 2 Overview:

We started the sprint with discussion about the overview of the project. Then we divided the work among us to clear tasks that needed to be done.

Sprint goal:

The goal for this sprint was to create a foundation for the project. We created first versions of both backend and frontend. We created a database in MariaDB, Maven project structure and Jacoco for code coverage testing. Also unit tests were created.

Completed tasks:

Created the database structure

Created the first version of the frontend

Created the Maven project folder structure

Added JaCoCo to the project

Created unit tests

Created the first version of the backend

What went well:

Everyone completed tasks assigned to them. The application is ready for further development.

Team 5 Name	Assigned Tasks	Time spent (hrs)	In-class tasks
Sampo	Managing the project	2	Submitted
Tom	Backend	4	Submitted
Aaro	Frontend	3.5	Submitted
